## A Tax-Advantaged Life Insurance and Retirement Plan

## Preface

In the accompanying presentation, you will see the financial data from an illustration of a cash value life insurance policy.

To help you make an informed decision about acquiring the policy, the illustration includes information about premiums, cash values and death benefits plus scheduled policy loan proceeds.

Cash value life insurance contains the following features:

1. Accumulating cash values;
2. Income tax deferred growth of cash values;
3. Competitive current interest rate;
4. Income tax free access to cash values via policy loans;
5. Income tax free death benefits;
6. Probate free death benefits;
7. Privacy of all transactions.

Favorable income tax consequences combine with significant policy values and benefits to produce a life insurance solution that has a considerable amount of financial leverage.

| To match Death Benefit of: $\$ 986,612$ | $14.40 \%$ |

## Income Tax Considerations

1. Hypothetical Taxable Investment: Interest is taxed as earned.
2. Indexed Universal Life:
a. Death Benefit including available cash value component is income tax free.
b. Loans are income tax free as long as the policy is kept in force.
c. Withdrawals and other non-loan policy cash flow up to cost basis (not in violation of IRC Section 7702) are income tax free as a return of premium.
d. Cash values shown assume most favorable combination of $b$ and/or c .
