# Executive's Share of a Leveraged Deferred Compensation Plan VS. An Equity Account 

## Introduction

A decision to acquire additional life insurance can represent one of several significant phases in your overall financial planning. An important part of this decision involves the comparison of the life insurance policy to alternative investment possibilities.

To help you make an informed decision about acquiring the policy, the accompanying presentation shows financial data regarding life insurance compared to an Equity Account.

The study offers information from which you and your advisers can draw informed conclusions about the suitability of either plan.

Following are major features of the life insurance policy for you to consider as part of your overall assessment:

1. Accumulating cash values;
2. Income tax deferred growth of cash values;
3. Competitive current interest rate;
4. Lifelong income options;
5. Tax free access to cash values through policy loans;
6. Income tax free death benefits for beneficiaries;
7. Probate free death benefits for beneficiaries;
8. Privacy of all transactions;
9. Advance of death benefits in certain adverse health circumstances -- as defined in the policy contract.

Favorable income tax consequences combine with significant policy values and benefits to produce a life insurance solution that has a considerable amount of financial leverage. This is particularly evident in the following presentation.

## Matching Values

Growth Required on an Equity Account in Addition to the Dividend Illustrated to Match Indexed Universal Life Policy Values over 60 Years.

## Income Tax Considerations

1. Equity Account: Capital gains tax calculations are taxed based on a ratio of asset value to remaining cost basis in any given year.
2. Indexed Universal Life:
a. Death Benefit including available cash value component is income tax free.
b. Loans are income tax free as long as the policy is kept in force.
c. Withdrawals and other non-loan policy cash flow up to cost basis (not in violation of IRC Section 7702) are income tax free as a return of premium.
d. Cash values shown assume most favorable combination of $b$ and/or c.

This is an InsMark supplemental illustration for indexed universal life. In an actual presentation, this footnote refers to an accompanying basic illustration from a specific life insurance company with important details, caveats, and guarantees.

| Equity | Equity |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Account | Account | Dividend | Income | Composite Capital | Turnover |
| Growth | Dividend | Tax Rate | Tax Rate | Gains Tax Rate* | Assumption |
| $7.50 \%$ | $1.00 \%$ | $25.00 \%$ | $45.00 \%$ | $30.00 \%$ | $10.00 \%$ |

*The composite capital gains tax rate includes 25.00\% short-term gains subject to ordinary income tax and $75.00 \%$ long-term gains subject to capital gains tax. The individual tax rates used to create the composite tax rate are:
Capital Gains Tax: 25.00\%
Income Tax: 45.00\%
**Column (7) is reduced by a $0.75 \%$ management fee.
(To review turnover calculations, see the Details of Portfolio Turnover report.)

Capital gains tax calculations are based upon a ratio of asset value to remaining cost basis in any given year.

*The composite capital gains tax rate includes 25.00\% short-term gains subject to ordinary income tax and $75.00 \%$ long-term gains subject to capital gains tax. The individual tax rates used to create the composite tax rate are:
Capital Gains Tax: 25.00\%
Income Tax: 45.00\%
**Column (7) is reduced by a $0.75 \%$ management fee.
(To review turnover calculations, see the Details of Portfolio Turnover report.)

Capital gains tax calculations are based upon a ratio of asset value to remaining cost basis in any given year.

# Executive's Share of a Leveraged Deferred Compensation Plan <br> VS. <br> An Equity Account 

## Taxation of Cash Flow

With equity accounts, dividends are taxed and the after tax balance either reinvested or used for scheduled cash flow. Capital gains tax calculations are based upon a ratio of asset value to remaining cost basis in any given year.

With cash value life insurance policies, withdrawals (also known as partial surrenders) are tax free up to cost basis and taxable thereafter. Policy loans are tax free so long as the policy stays in force until death. The source of the cash flow from the life insurance policy in this presentation is policy loans.

Note: Policy loans reduce policy cash values and death benefits, and the lapse of a loaned policy could result in severe tax ramifications to the policy owner. Be sure to consult a professional tax adviser if you have any questions about this issue.

## IRS Circular 230 Disclosure

This statement is required by IRS regulations (31 CFR Part 10, §10.35): Circular 230 disclaimer: In order to comply with requirements imposed by the IRS which may apply to the accompanying documents (including any attachments, enclosures, or referred material) as distributed or as re-circulated, please be advised that the material contained herein is not intended or written to be used, and it cannot be used, by anyone for the purposes of avoiding any penalty that may be imposed by the Internal Revenue Service under the Internal Revenue Code. In the event that the accompanying material (including any attachments, enclosures, or referred material) is also considered to be a "marketed opinion" within the meaning of the IRS guidance, then, as required by the IRS, please be further advised that the material is written to support the promotions or marketing of the transactions or matters addressed, and based on the particular circumstances, you should seek advice from an independent tax advisor.

## Important Note

The information in the accompanying material is for educational purposes only. In all cases, the approval of a client's legal and tax advisers must be secured regarding the implementation or modification of any planning technique as well as the applicability and consequences of new cases, rulings, or legislation upon existing or impending plans.
